Professional Summary

Detail-oriented and motivated B.Tech student specializing in Artificial Intelligence and Data Science with a strong academic foundation in **HTML, CSS, and JavaScript**. Possesses solid knowledge of **ObjectOriented Programming (OOP), database concepts, and front-end fundamentals**. Eager to contribute to software development teams, apply analytical thinking to real-world problems, and continuously enhance technical expertise in a professional IT environment.

Education

Bachelor of Technology (AI & DS) Expected Graduation: 2026
Audisankara Institute of Technology, Gudur, Andhra Pradesh CGPA: 8.43

Technical Skills

Programming Languages: HTML, CSS, JavaScript

Core Concepts: Object-Oriented Programming (OOP), Database Management Systems (DBMS)

Tools & Technologies: Eclipse IDE, , Visual Studio Code, Git (basic)

Academic Project

Calculator Application

[\\$ Project Link](#)

- Designed and developed a responsive calculator application using **HTML, CSS, and JavaScript**.
- Implemented arithmetic operations including addition, subtraction, multiplication, and division with real-time output.
- Utilized JavaScript event handling and conditional logic to ensure accurate calculations and smooth user interaction.
- Emphasized clean UI design, usability, and cross-device compatibility.
- Strengthened problem-solving skills and front-end development fundamentals through hands-on implementation.

Certifications & Achievements

- Certified in **Java Programming** – Oracle Academy
- Completed **SQL for Data Management** – Coursera

Soft Skills

- Clear communication and teamwork abilities 1
